## UPDATE ON METABOLIC SYNDROME

## PHARMACY MEETS CARDIOVASCULAR PHARMACOTHERAPY

Dear colleagues,

Metabolic syndrome and the associated cardiovascular risk are increasingly becoming the focus of preventive and therapeutic measures.

A lifestyle that is characterized by a high-sugar and high-fat, high-calorie diet and little physical activity in a large proportion of our population increases risk factors and the resulting organ damage. In order to take measures to contain this "pandemic" of overweight and obesity, diabetes mellitus, hypertension and dyslipidemia, medical support is usually necessary.

Our congress, held for the first time as a local national meeting of the International Society of Cardiovascular Pharmacotherapy in Austria, offers an up-to-date overview. In addition to keynote lectures, tandem sessions, which present specific topics from a medical and pharmaceutical point of view, are an inspiring format. Pharmacotherapy for metabolic syndrome has undergone a diverse, complex and incredibly rapid development in recent years.

We invite you, as a physician or pharmacist, to discuss the possibilities of prevention and therapy, and offer you a forum in a new structure to support your work in practice, pharmacy or clinic.

We look forward to your participation!

Heinz Drexel, Raimund Weitgasser and Daniela Schuster  
Local Organizing Committee,  
Feldkirch and Salzburg, Austria

January 2024

PS: Please note that the main part of the Meeting will be held in German Language!

## Scientific program (list of topics)

- Happiness and cardiovascular disease
- How to publish in cardiovascular pharmacotherapy
- Diabetes mellitus
- Anticoagulation
- Hypertension
- The president's lecture
- Omega-3-fatty acids
- Mechanisms of SGLT2-inhibition
- Drug treatment of LDL-cholesterol
- Congestive heart failure
- Polypharmacy
- GLP1-RA in diabetes and obesity
- The present and the future of the European Medicines Agency

# UPDATE ON METABOLIC SYNDROME

## PHARMACY MEETS CARDIOVASCULAR PHARMACOTHERAPY
